

**United Healthcare Molecular Pathology Policy Process Update: Client Notification**

Dear Valued Client,

As of January 1, 2020, United Healthcare (UHC) implemented changes to its molecular pathology policy. This policy change has direct impact on panel test orders. Due to this change, we are recommending a new test ordering sequence for patients with UHC health insurance plans to minimize their out of pocket costs.

We suggest that genetic testing, which includes BRCA1/2, be ordered as follows for patients covered by UHC health insurance:

- (1) Order test code B362(-5) on GenPath’s Hereditary Cancer, Urology, or Women’s Health requisitions.
- (2) If you would like a second test to be completed if the first test for BRCA1/2 is negative or a variant of uncertain significance is identified, check “Reflex to test code” and write in “B749 for all the rest of the genes in panel XXXX”, under the BRCA1/2 section, where “XXXX” is the test code of the panel of genes you wish to reflex to. Test code B749 is for the GeneDx OncoGeneDx custom panel where any combination of up to 82 hereditary cancer genes may be selected.

**Hereditary Cancer TRF:**

HEREDITARY CANCER TESTS & PANELS	
<input checked="" type="checkbox"/> B362-5 BRCA1/BRCA2 Sequencing and Deletion/Duplication Analysis ↓ Reflex to test code: <b>B749 for all the rest of the genes in panel J055-5</b>	<input type="checkbox"/> B275-9 Comprehensive Common Cancer Panel (47 genes)
<input type="checkbox"/> B361-7 BRCA1/BRCA2 Ashkenazi Founder Panel (Three Targeted Pathogenic Variants) <sup>1</sup> ↓ Reflex to test code: _____	<input type="checkbox"/> B751-9 Common Cancer Management Panel (37 genes)
<input type="checkbox"/> J055-5 Breast Cancer Management Panel (9 genes)	<input type="checkbox"/> B522-4 Lynch/Colorectal High Risk Panel (7 genes)
<input type="checkbox"/> B273-4 Breast/Gyn Cancer Panel (24 genes)	<input type="checkbox"/> B274-2 Colorectal Cancer Panel (20 genes)
<input type="checkbox"/> T831-7 Brain Tumor Panel (23 genes) <sup>1</sup>	<input type="checkbox"/> B343-5 Pancreatic Cancer Panel (15 genes)
<input type="checkbox"/> B399-7 Melanoma Panel (9 genes)	<input type="checkbox"/> J665-1 Hereditary Prostate Cancer Panel (16 genes)
<input type="checkbox"/> B394-8 Renal Cancer Panel (18 genes)	<input type="checkbox"/> T830-9 Hereditary MDS/Leukemia Panel (12 genes) <sup>1</sup>
	<input type="checkbox"/> B363-3 Rest of Comprehensive Common Cancer Panel, if first test is negative

**Urology TRF:**

HEREDITARY PROSTATE CANCER <sup>1</sup>	MULTIPLE CANCER PANELS
<input type="checkbox"/> J665 Hereditary Prostate Cancer Panel <input type="checkbox"/> B363 If negative reflex to Rest of Comprehensive Common Cancer Panel	<input type="checkbox"/> B275 Comprehensive Common Cancer Panel <input type="checkbox"/> B751 Common Cancer Management Panel
HEREDITARY RENAL CANCER	<input type="checkbox"/> B363 If negative reflex to Rest of Comprehensive Common Cancer Panel
<input type="checkbox"/> B394 Renal Cancer Panel <input type="checkbox"/> B363 If negative reflex to Rest of Comprehensive Common Cancer Panel	
BRCA1 AND BRCA2	
<input checked="" type="checkbox"/> B362 BRCA1/2 Sequencing and Deletion/Duplication Analysis ↓ Reflex to test code: <b>B749 for all the rest of the genes in panel J655</b> <input type="checkbox"/> B363 If negative reflex to Rest of Comprehensive Common Cancer Panel	<input type="checkbox"/> B361 BRCA1/2 Ashkenazi Founder Panel <sup>2</sup> <input type="checkbox"/> Reflex to test code: _____

**Women’s Health TRF:**

HEREDITARY CANCER TESTS & PANELS
<input type="checkbox"/> B361-7 BRCA1/BRCA2 Ashkenazi Founder Panel (3 Targeted Pathogenic Variants) <sup>1</sup> <input type="checkbox"/> Reflex to test code: _____
<input checked="" type="checkbox"/> B362-5 BRCA1/BRCA2 Sequencing and Deletion Duplication Analysis ↓ Reflex to test code: <b>B749 for all the rest of the genes in panel J055-5</b>
<input type="checkbox"/> B275-9 Comprehensive Common Cancer Panel (46 Genes)
<input type="checkbox"/> B751-9 Common Cancer Management Panel (37 Genes)
<input type="checkbox"/> J055-5 Breast Cancer Management Panel (9 Genes)
<input type="checkbox"/> B273-4 Breast/Gyn Cancer Panel (23 Genes)
<input type="checkbox"/> B522-4 Lynch/Colorectal High Risk Panel (7 Genes)
<input type="checkbox"/> B363-3 Rest of Comprehensive Common Cancer Panel, if subpanel is negative

**IMPORTANT NOTE:** If reflex testing is ordered, you will receive two separate test result reports. The first report for test code B362(-5) (BRCA1/2 genes) will be reported 8-10 business days after testing begins. The second report for the additional genes ordered as part of test code B749 will be reported approximately 2 weeks after you receive the B362(-5) test report.

Please reach out to us (1-888-729-1206, [zebras@genedx.com](mailto:zebras@genedx.com)) with any questions. We are here to help!

Thank you,  
The GenPath Team
